

LOKESH MUNAKALA

Visakhapatnam, Andhra Pradesh, India

+91 7396287000 munakalalokesh222@gmail.com linkedin.com/lokesh-munakala github.com/Lokesh0018

Summary

- Computer Science undergraduate with experience building full-stack web applications using Java, Spring Boot, React, Node.js, PostgreSQL, and MongoDB, with a focus on scalable software development.

Education

Raghu Institute of Technology

B.Tech. in Computer Science and Engineering

Sep 2023 – May 2026

CGPA: 8.6 / 10

Government Polytechnic College Anakapalli

Diploma in Computer Engineering

Sep 2020 – Mar 2023

GPA: 7.7 / 10

Experience

Jr. Software Development Engineer Intern, Tilicho Labs

Jan 2026 – Present

Full Stack Development Intern

- Developed frontend and backend features for production-grade web applications using modern full-stack technologies.
- Collaborated with senior developers on API integration, debugging, testing, and deployment activities.
- Received a stipend of 10,000 per month.

IT Intern, Visakhapatnam Port Authority

Dec 2022 – Jun 2023

Worked on internal feedback systems to improve employee engagement and feedback collection.

- Assisted in developing an internal web-based feedback system to streamline communication.
- Developed backend APIs, significantly improving data retrieval performance.

Projects

Result Scale – Secure Result Distribution SaaS Application | React, Node.js, Express, PostgreSQL, Brevo API

- Designed and developed a scalable multi-tenant SaaS platform for educational institutions to securely distribute student results.
- Implemented OTP-based authentication, expiring result links, RBAC authorization to protect sensitive academic data.
- Built hierarchical organization management supporting institutions, administrative users, and granular permissions.
- Integrated Brevo APIs for OTP delivery, transactional emails, user invitations, and automated notifications.
- GitHub:** github.com/Lokesh0018/result-scale

Hall Ticket Generator with OTP Authentication & Multi-Admin Control | Spring Boot, React, MySQL

- Designed and developed a full-stack web application using Spring Boot, React, and MySQL.
- Implemented OTP-based authentication, role-based access control (RBAC), and secure REST APIs.
- Automated hall ticket generation with backend validation, admin workflows, and database integration.
- GitHub:** github.com/Lokesh0018/HT-Generator

Web Applications Suite | React, Spring Boot, MySQL, JavaScript

Personal Projects

- Developed multiple full-stack and frontend applications including Student Management System, Login & Registration System, Google Search Clone, Todo App, and Age Calculator.
- Built CRUD functionality, REST API integrations, authentication workflows, responsive user interfaces, and database-driven applications using React, Spring Boot, and MySQL.
- Implemented user authentication, form validation, state management, and persistent data storage following modern web development practices.
- GitHub:** Student Management, Login & Registration, Todo, Google Search Clone, Age Calculator

Technical Skills

Programming Languages: Java, JavaScript, TypeScript, Python, SQL, C++, C

Frontend: React.js, HTML5, CSS3

Backend: Spring Boot, Express.js, REST APIs

Databases: MySQL, PostgreSQL, MongoDB

Tools & Platforms: Git, GitHub, Fork, Postman, VS Code, Eclipse IDE

Core Skills: Problem Solving, Data Structures & Algorithms, OOP, System Design, Team Collaboration, Communication
